

Repair Therapeutics Insiders Establish Automatic Securities Disposition Plans

March 29, 2021

CAMBRIDGE, Mass. & MONTREAL--(BUSINESS WIRE)--Mar. 29, 2021-- Repair Therapeutics Inc. ("Repair" or the "Company") (Nasdaq: RPTX), a leading clinical-stage precision oncology company enabled by its proprietary synthetic lethality approach to the discovery and development of novel therapeutics, today announced that each of its Executive Vice President and Chief Financial Officer, Steve Forte and its Executive Vice President and Chief Medical Officer, Maria Koehler (collectively, the "Executives"), have established Automatic Securities Disposition Plans ("ASDPs") in accordance with applicable United States and Canadian securities legislation, including U.S. Securities and Exchange Commission ("SEC") rule 10b5-1 and the recommended practices set forth in the recently issued Canadian Securities Administrators' Staff Notice 55-317 ("Staff Notice 55-317") and the Company's internal policies.

While Repair is listed on the Nasdaq Global Select Market, it is also considered a reporting issuer under the Securities Act (Québec) and is therefore announcing the establishment of the ASDPs in furtherance of the recently published guidance provided by the Canadian Securities Administrators in Staff Notice 55-317.

Under U.S. and Canadian securities laws and the Company's trading policies, insiders of Repair are subject to limits on their ability to sell shares in the Company. The ASDPs address this issue by permitting trades to be made in accordance with pre-arranged instructions given when Executives are not in possession of any material undisclosed information.

Up to 42,182 common shares of Repair may be sold under the ASDPs implemented by the Executives in the aggregate. The ASDPs are designed to allow for an orderly disposition of each of the Executives' shares in Repair at prevailing market prices over the course of the approximately 14 months that the ASDPs are expected to be in place. Sales of the common shares under the ASDPs will only commence after the Company has filed its Form 10-Q with the SEC for the quarter ending March 31, 2021 in accordance with the recent recommended practices set forth in Staff Notice 55-317.

Each Executive has provided for clear trading parameters and other instructions in writing to the independent dealers administering the ASDPs, specifying the number of securities to be sold and setting out minimum trade prices, which in all cases materially exceed the current trading price of the Company's common shares, and the dates or frequencies of sales. The ASDPs prohibit the dealer administering the ASDPs from consulting with the Executives regarding any sales under the ASDPs and prohibit the Executive from disclosing to the dealer any information concerning the Company that might influence the execution of the ASDPs.

The ASDPs contain meaningful restrictions on the ability of the Executives to amend, suspend or terminate the ASDPs that have the effect of ensuring that the Executives cannot benefit from material non-public information. In addition, our Executives may only have one ASDP in place at any given time.

About Repair Therapeutics Inc.

Repair Therapeutics is a leading clinical-stage precision oncology company enabled by its proprietary synthetic lethality approach to the discovery and development of novel therapeutics. The Company utilizes its genome-wide, CRISPR-enabled SNIPRx® platform to systematically discover and develop highly targeted cancer therapies focused on genomic instability, including DNA damage repair. The Company's pipeline includes its lead product candidate RP-3500, a potential leading ATR inhibitor, as well as RP-6306, its CCNE1-SL inhibitor and its Polθ inhibitor programs.
